### PROFILE

Senior UX researcher and data analytics lead with 10+ years turning field data and user insight into decisions for pan-African and international programs. I sit at the intersection of UX research, data engineering, and program analytics: I run user research, design KPI systems and dashboards, and translate both into product and program decisions. Track record with Mastercard Foundation, the Graça Machel Trust, and USAID-funded initiatives, researching and coaching entrepreneurs across 10+ countries. Comfortable owning a research or analytics workstream independently and remotely, end to end, for distributed teams.

---

### CORE SKILLS

**UX Research / Design:** User interviews, usability testing, journey mapping, service blueprints, personas, wireframing & prototyping, Figma, Adobe XD

**Data Analysis:** KPI systems, M&E / MEAL frameworks, ETL pipelines, SQL, Python, R, Power BI, SPSS, STATA, Excel

**Program and Product Analytics:** Donor and impact reporting, dashboard design, adaptive learning systems, business plan evaluation

**Web:** HTML, CSS, JavaScript, PHP — enough to prototype and validate ideas hands-on

**Leadership:** Program management, coaching, capacity building, cross-functional team leadership

---

### EXPERIENCE

#### Program Officer — Mastercard Foundation × Concree — Alumni Start-ups in Transition Program

*Oct 2025 – Present*

- **Own** a centralized database tracking KPIs and performance indicators for a full cohort of alumni entrepreneurs, feeding M&E reporting for institutional funding partners.
- **Built** growth-metrics frameworks (revenue, jobs created, capital raised) and produce recurring impact reports for the Mastercard Foundation.
- **Coach** founders 1:1 on positioning, business model and operations, pulling in finance, marketing and tech expertise as needed.
- **Design** and facilitate training and capacity-building workshops on strategy, financing and growth for entrepreneurs in resource-constrained markets.

#### Expert Consultant and Technical Coach — Graça Machel Trust — Women Creating Wealth Program

*Sep 2024 – Sep 2026*

- **Designed** program data systems spanning collection, processing and visualization of impact indicators, enabling real-time adaptive learning across a pan-African cohort.
- **Led** field research — interviews, observation, focus groups — to map the coaching experience for beneficiaries and turn friction points into concrete recommendations.
- **Advised** a pan-African cohort of women entrepreneurs on strategy, financial management, commercial growth and access to funding.
- **Evaluated** business plans against viability, job-creation and impact criteria; recommendations directly informed funding decisions.
- **Built** KPI dashboards and donor reporting frameworks, and delivered masterclasses on entrepreneurship, growth and user-centered design.

## Expert Consultant — Force N — Mastercard Foundation × University Cheikh Hamidou Kane

Oct 2023 – Jan 2026

- **Designed** and ran large-scale user research with 14,000+ entrepreneurs across West Africa to map learning behaviors and engagement barriers.
- **Translated** research findings into digital training modules built around the constraints of African learners.
- **Facilitated** webinars and workshops on ideation, business modeling and growth for diverse digital audiences.

## Senior Data Analyst — Compagnie Prestige Immobilier

Apr 2024 – Nov 2024

- **Deployed** a structured statistical system centralizing company data for the executive committee's strategic decisions, automating recurring data flows.
- **Managed** the client database — cleaning, segmentation, governance — and built statistical forecasting models on price and demand trends that shaped investment decisions.

## Co-founder — Carvi Food (AgriTech startup)

Apr 2017 – Sep 2026

- **Founded** a food-processing company (dried fruit, dried meat) from concept to market; owned product, production, and commercial strategy.
- **Raised** \$150,000+ in innovation funding through competitions and private investors.
- **Built** cross-functional teams across R&D, production, marketing and finance, and built a local-sourcing model that expanded women's participation in the agricultural value chain.

## Earlier Experiences

- Data UX Designer / M&E Assistant, Young African Leadership Initiative (YALI), Dakar (2018–2019) — designed decision dashboards for non-technical program teams and alumni impact-tracking systems.
- Data Analyst Consultant, Group Performance — Big Data (2016) — led field data collection and analysis for large-scale quantitative surveys using SQL, SPSS, R and STATA.
- Statistical and Marketing Analyst, La Voix du Client (2014–2016) — ran client-satisfaction analytics and survey quality audits.

## EDUCATION & CERTIFICATIONS

---

- Web Applications for Everybody — University of Michigan (2026): SQL, JavaScript, Databases, HTML/CSS
- Project Management Foundations — University of California, Irvine (2026): scope, budget, risk, planning
- Google UX Design Certificate — Google (2026): Figma, Adobe XD, user research, wireframing, prototyping, usability testing
- Entrepreneurship & Business Leadership — Drake University, Iowa, USA (2019)
- M.Sc., Statistical Engineering — National School of Statistics and Economic Analysis (ENSAE), Dakar (2014)
- Results-Based Project Management — Université Atlantique, Dakar (2014)
